Then it's compliance they make sure you follow rules, they make sure contractors follow all the policies through. Next is Customer Service they be on phones you can call them to pay or when somethings going wrong. Now you got records they keep stuff since '37. They scan and store documents in the event of harsh weather. Now is operations and collections, operations manages the flow of water in the plant and collections manage 400 miles of sewer lines and they both come together to make sure everything is working fine. Now you got finance in the cut they handle money and make sure all the claims are all put up. And there's the lab that collect water from this place and they test it all to make sure everything is safe. Aye! Oh you thought I was done. Naw I'm bout to spit some more facts just for fun. You got HR that handle employee needs. And if an employee has a problem they can go if they please. Then there's IT, IT fix all the technology. Technology that works through the whole facility. Our, warehouse has all you need, and if they don't have it they will order whatever you please. That's all there is. Now you know all about the departments and I hope it's clear that GSD we are all a team that keeps everything clean.
